## Lead Systems Engineer

6/2016-Present, Oregon Army National Guard, J6/DCSIM

- Full-stack systems engineering
- IT service management
- Datacenter infrastructure management
- Budget planning, forecasting, and analysis

## Cyber Defense Technician

11/2013-Present, Oregon Army National Guard

- Cyberspace Operations Planning, DCEO, DCO-IDM, OCEO
- Cyber Exercise Design
- Selected as team top performer for Cyber Guard 2014
- Principal point-of-contact with external groups in the planning and coordination of efforts to enhance the team's potential to interoperate across state lines.
- Design and build the landing points for Cyber Shield 2015
- Kali, Security Onion, and Rucksack Instructor for Cyber Shield 2015
- Use judgment, initiative, and resourcefulness in deviating from established methods to develop new methods and criteria.
- Forensics, Firmware Reversing, Carving
- Interface with individuals or groups from outside the agency, including consultants, contractors, vendors, or representatives of professional associations, the media, or public interest groups, in moderately unstructured settings.
- Influence and persuade employees and managers to accept and implement findings and recommendations.

## Hacker

3/2002-Present, The Internet

- BootKit Development
- Independently plan, design, and carry out the work to be done
- Network intrusion and exploitation
- Google Dorking / Google-Fu, Data Mining
- Media malware analysis
- Information Warfare

## Network Engineer

6/2012-6/2016, Oregon Army National Guard, J6/DCSIM, NOC

- Apply IT security principles and methods
- Plan and perform systems administration tasks spanning multiple IT disciplines
- Apply systems administration and systems engineering theories, concepts, and methods
- Design and troubleshooting DMVPN
- Extensive knowledge of the enterprise IT architecture
- Use guidelines that are often ambiguous and express conflicting or incompatible goals and objectives, requiring extensive interpretation.
- Manage all WAN sites in the state of Oregon
- Manage 3 distributed datacenter networks

- Fluent in Cisco IOS, IOS-XE, and NXOS
- VMware virtual infrastructure design and implementation
- Decent in BASH, PowerShell, and JavaScript
- Exercise judgment and initiative in identifying and recommending potential areas for enhancing systems reliability and functionality.
- Pretty good with the CERT NetSA Suite
- NSM/SIEM (Security Onion)
- Frequently interprets regulations on his/her own initiative, applies new methods to resolve complex and/or intricate, controversial, or unprecedented issues and problems, and resolves most of the conflicts that arise.

## Senior Information Systems Specialist

7/2011 – 11/2013, C/STB 41 IBCT

- WIN-T, Systems Administration, Network Engineering, Monitoring
- Affect the availability of systems used by employees at all levels in the organization to effectively accomplish critical business processes.
- Net Tech for the Brigade Net-Ops Section

## Electronic Warfare Officer / Combat Engineer

11/2009-11/2010, TF Thor, JTF Paladin

- Install electronic warfare hardware, firmware, and threat loads for the DUKE II, DUKE III, CVRJ, and MMBJ jamming systems.
- Calibrate and operate a spectral analyzer to insure jamming accuracy
- Managed Backup and restore operations as well as disaster recovery for Thor 3
